

An Introduction to Hominid Biodiversity

By Julie Wieczkowski and Charles Peters

Casts of hominid skulls, and footprints are the focus of this module. Students will finally be able to see and feel replicas of the bones of the hominid species they have heard so much about in lecture. A short written assignment that will accompany the casts.

This Module Contains:

T.A. Instructions

Fossils Casts (NOT in this box, see cabinet in G31)

Brief descriptions of each cast

Supplemental Materials

19 slides

Advanced Preparation

T.A. must be familiar with the casts

*Do NOT distribute master copies
